

Visual Studio Enterprise Subscription Pilot

A one-page report for NSCC IT leadership

01	02	03	04
CA\$200	Aug 2028	E5 / 25	Phase 4
Azure credit / month / subscriber	Program valid through	M365 dev tenant / licenses	Pilot stage / students onboarding

I. WHAT IT PROVIDES

Azure

- ~CA\$200 / mo credit
- All major services in scope
- Marketplace & reserved excluded
- Renewal tied to activation date

M365

- Full E5 developer tenant
- 25 user licenses, renewable 90d
- Entra / Intune / Teams testbed
- Conditional Access scenarios

Developer Tools

- Visual Studio 2022 Enterprise
- Azure CLI, PowerShell Az
- Bicep / IaC tooling
- VS Code (free, listed for parity)

II. ROADBLOCKS CLEARED

III. WHERE WE ARE NOW

A subscription previously stranded in the NSCC corporate tenant is now under a controllable sandbox tenant, with scoped student access, working IaC, and a documented cleanup playbook. The pilot is operational.

REPO	nssc-mscloud-resources
DOCS	Tenant + IAM playbook, 5 service guides
LAB	01 / Linux VM via SSH
IAC	student-vm Bicep template
OPS	PowerShell cleanup + tagging

IV. TO SCALE BEYOND THE PILOT

- **Help Desk pathway** — Define a referral route so pilot users surface in the existing ticket flow.
- **Cohort decision** — Approve / decline expansion to additional courses; we will size credit need.
- **Tenant succession** — Name a second admin on the sandbox tenant so ownership outlives the pilot.
- **Budget thresholds** — Confirm institutional preference: 80% alert default, or stricter.
